

markilux 75

The patented side blind. Prevents inquisitive glances, protects against low-lying sun and light wind. The markilux that opens up into much more than it seems

markilux

markilux 75

The patented side blind. Prevents inquisitive glances, protects against low-lying sun and light wind. The markilux that opens up into much more than it seems

Design features

- when retracted the cover is protected from the weather by the cassette, which encloses it completely
- slim cassette, only 60 mm x 60 mm in size
- for long-lasting attractiveness the awning has been powder coated
- one-piece covers made from widely woven, plain awning fabrics make it possible to do away with seams entirely

Technical highlights

- the cover can be extended continuously up to a maximum drop of 200 cm so allowing the ideal degree of privacy and sun protection
- when not in use, the cassette is simply folded down and fixed inconspicuously against the wall
- with locking mechanism to prevent the screen rolling up unintentionally in a gust of wind

² = available from stock

³ = available to special order

Screen width definition: the screen width is measured with the screen unfolded from the end of the cassette to the wall.

Definition of the unit height: the unit height is measured with the screen unfolded from the top of the cassette to the bottom of the lath.

The width of the screen cover is always **less** than the width of the screen. For cover sizes please see the section "Housing Tolerances and Awning Cover Dimensions".

Programme: Standard specification (held in stock) - 6 pieces per delivery, bespoke specification (made to order) - individual delivery. Please consult the price list.

The stripes in patterned fabrics always run down the cover

Frame colours

traffic white - RAL 9016

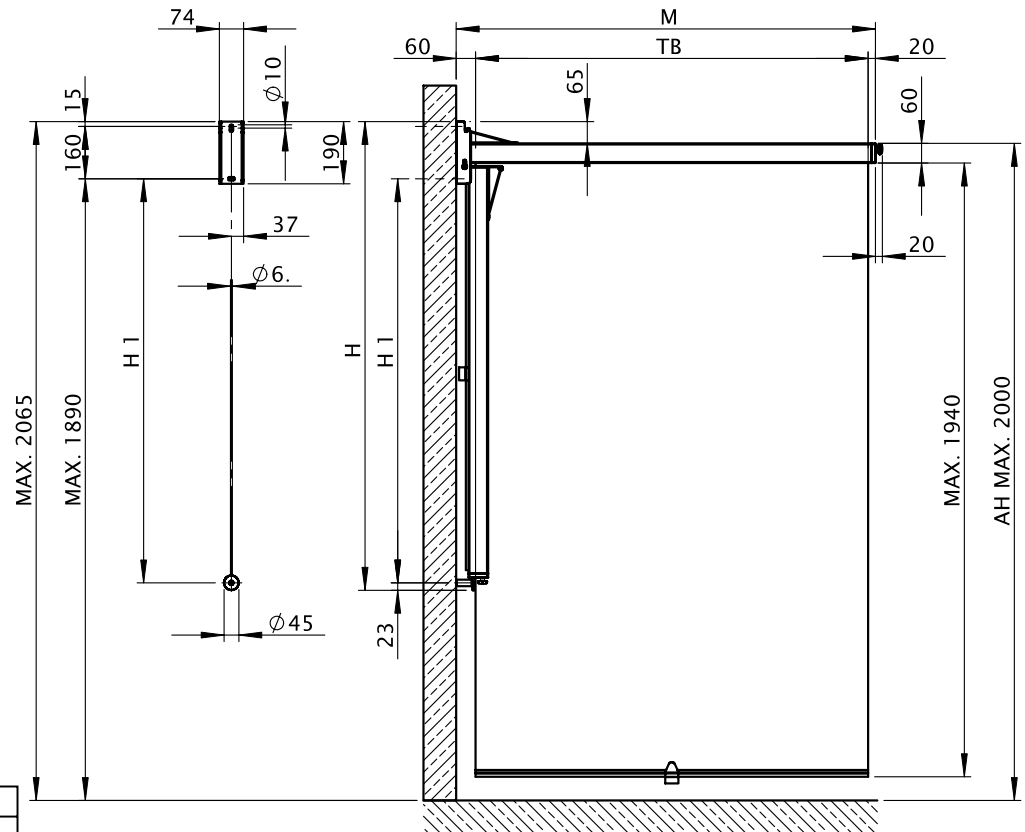

special powder-coated finish

* Colours similar to the RAL chart - these may differ slightly from those depicted in both hue and finish.

Installation dimensions

Dimension overview

AM
